

REDEFINING ATM MANAGEMENT

**Future-Ready
Freedom & Flexibility**

WHAT ATMs HAVE BEEN

Limited function devices constrained by NDC/DDC protocols, largely limited to balance inquiry, cash withdrawals and deposits.

Outdated screens of the DOS era; difficult to implement new messaging and branding.

WHAT ATMs CAN BE

Multi-function, revenue generating devices offering features such as tax payments, merchant pay-outs, bill pay, mobile top-ups, and other VAS.

Contemporary screens of the smartphone era, including video and dynamic buttons.

UNLEASH THE FULL POTENTIAL OF YOUR ATM FLEET

- Deliver the features you want, when you want.
- Customize screens and roll out new features with ease
- Monitor your entire fleet in real-time from one browser based platform
