Euronet Digital Wallet Solution

Your path to digitization has to include your payment cards — essentially creating a digital wallet for your cardholders. Not only will your bank be perceived as innovative but digital wallets, or issuer wallets as they are sometimes called, introduce a solution that is more secure and provides cardholder service choices while reducing your card production costs.

Give your cardholders the option to store a digital image of their cards on their phone and pay directly from their phone wherever contactless payment terminals are available. No need to look for the plastic — the card is on their phone and available whenever needed.

Seamless integration with Euronet's Card Management systems, the international payment networks, and a trusted partner for the phone SDK keeps your card 'top of wallet' for your cardholders.

Give cardholders a convenient, state-of-the-art option that makes payments simple.
