Ren

Euronet®

AN ENTERPRISE PAYMENT PLATFORM
FOR RELIABILITY AND FREEDOM
WITH MICROSERVICES & API MODERNIZATION

Stay competitive in the evolving payments landscape with Ren, innovative software for in-house or private cloud installations. Ren's flexibility and adherence to industry standards make it ideal for modernization and intelligent routing across any application or system.

Lower Total Cost of Ownership
Ease maintenance concerns and pursue new opportunities with the low risk microservices of Ren.

Infinite Messaging
Process QR codes, fingerprints, graphics, or other data types in a single transaction.

100% Uptime by Design
Make changes and updates without slowing the system down or needing idle redundant servers.
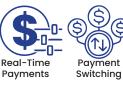

Adaptive Routing
Proactively and logically identify the optimum internal routing path to process each transaction.

Power Small to Large Solutions, Including Complex Transaction Environments
